### DETAILED ACTION

1. A telephone call was made to the attorney of record name Leon R. Turkevich, on 4-07-2004 to require a new terminal disclaimer base on the newly found of U.S. Patent No. 6,473,495. However, an agreement was not reached, therefore, the Office Action is follows.

#### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 6,473,495. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-12 in the constant application have the same scope of claimed invention with obvious wording variations. The above patent includes a telephone instrument, network

termination basic access, high pass filter, and a method of implementing a local area network in a home telephone network for sending and receiving ISDN based signals. The system comprising the element of telephone, computer, ISDN devices and a high pass filter for transmitting and receiving ISDN signal and analog signals.
